DESCRIPTION

The LARQ PureVis™ 2.0 1,000 ml water bottle is a stainless steel, all-in-one bottle designed for everyday hydration with improved water quality. It combines a two-stage filtration process with UV-C purification built into the cap to reduce odours and purify the interior. The UV-C LED activates automatically every two hours and can also be started manually; the rechargeable battery uses USB-C for extended use. A detachable carry handle makes transport easy, and filters should be replaced regularly to maintain optimal performance.

This custom / personalised water bottle with logo is suitable for businesses, sports clubs, associations, schools, events and private individuals. Personalisation options include digital printing, object screen printing, pad printing (tampography) and laser engraving, allowing you to apply logos, messages or graphics for promotional gifts, merchandising or corporate giveaways.
