Reference	2441
Composition	PVC
Material	PVC
Average weight	0.201
Dimensions	122 x 70CM
Country of origin	China
Carton	48 pieces

DESCRIPTION

The Hamafloat inflatable hammock is designed for poolside and waterside leisure. Constructed from PVC with a central mesh sleeping area, it combines buoyancy with comfort; maximum load is 80 kg and overall size is 122 x 70 cm. This unisex leisure item is simple to inflate and handle, ideal for occasional outdoor use. Care is straightforward: rinse with fresh water and dry flat before storing.

The design features a mesh panel that supports the body above the water and two inflatable tubes at head and foot for stable flotation. Welded seams and reinforced joins around the mesh provide consistent durability; inflation uses standard valves. It packs compactly for easy transport and storage.

Customisation is available by screen printing on the object, making it suitable for companies, sports clubs, associations and event organisers looking for personalised hammocks to promote activities. Minimum order quantity: 24 pieces (colours and sizes combined). Free quote within 24 hours on weekdays; graphic studio support available to prepare your artwork.
