DESCRIPTION

The Shaka lanyard charging cable is a phone accessory combining a 60W USB-C to USB-C RPET braided cord with a phone support and aluminium finishings. The braided cord and metal slider provide comfortable wear around the neck, while the dual-ended cable keeps devices accessible. It is available in several colours, including black, and measures approximately 100 cm — practical for everyday use when you need hands-free access to your phone.

The product features a split cable exit with metal end caps and a flat attachment point for a phone support. The aluminium details improve durability and the braided RPET cable resists wear; routine care consists of wiping metal parts and spot-cleaning the cord by hand.

This personalised lanyard is suitable for companies, sports clubs, associations, events and private customers and can be branded by laser engraving, pad printing (tampography), digital printing or doming. Minimum order: 50 pieces (colours and sizes combined). We provide free quotes and offer studio services to vectorise or touch up your logo.

COLOURS (1)

Black
