Country of origin	China
Carton	60 pieces

DESCRIPTION

The Twing wireless charger is a slim, circular charging pad made from recycled ABS that powers compatible smartphones by placing them on the pad. Measuring Ø9.8 x 0.7 cm and offering an output of DC 9V/1.1A (10W), it supports recent Android devices and iPhone® 8, X and newer models. Its low-profile design fits neatly on desks, reception counters or in meeting rooms.

The compact footprint and thin profile make the charger easy to transport and position; the power cable plugs directly into the unit for immediate use. Operation is straightforward: place your phone on the pad and charging begins, with no need for connectors on the device itself.

This personalised wireless charger can be marked by digital printing or pad printing, both suitable for recycled ABS. Minimum order: 30 pieces (colours and sizes combined) — smaller quantities are possible with additional fees. A practical choice for companies, events, associations, clubs and private customers seeking a sustainable promotional item.
