DESCRIPTION

Coolio champagne bucket in stainless steel is a compact kitchen utensil (Ø11.5 x 18.5 cm) designed to present and help keep a bottle cool during service. Its stainless steel construction and double-wall build give a neat appearance and solid handling; maintenance is straightforward, making it suitable for both professional and home environments.

The cylindrical, unadorned shape features a smooth finish and a straight upper rim to ease bottle placement. A low-profile base provides stability without affecting the clean silhouette. The absence of handles and decoration makes this bucket versatile for restaurants, caterers, events and corporate gifting.

Customisation options include laser engraving, digital printing and pad printing, making this a personalised kitchen utensil for businesses, clubs, associations and private customers. Minimum order: 8 pieces (colours and sizes combined). Our graphic studio can prepare or vectorise your logo on request.
