Reference	9075
Composition	Aluminium
Material	Aluminium
Average weight	0.155
Dimensions	7.5 x 12.5 x 1.3 CM
Country of origin	China
Carton	50 pieces

DESCRIPTION

This compact aluminium powerbank, the Solarflat, provides 4000 mAh capacity suitable for charging a smartphone. Its top surface incorporates a solar charging panel intended for emergency use, handy when outdoors or travelling. Output is DC 5V / 1A for straightforward, controlled charging. The unit includes an indicator light and comes with a USB cable with a micro-USB connector. Dimensions are 7.5 x 12.5 x 1.3 cm, with a slim, rounded profile for easy storage in a pocket or bag.

The recycled aluminium housing gives a solid feel and protects internal components; rounded edges improve handling. One face shows the recessed solar panel while the side contains the ports and a row of LED indicators to display charge level. No special maintenance is needed beyond avoiding immersion in water.

The Solarflat can be personalised by laser engraving, pad printing or digital printing, making it suitable for businesses, clubs, associations and event giveaways. As a personalised powerbank it works well for trade shows and corporate gifts. Minimum order: 25 units (colours and sizes combined); free quote within 24 hours on weekdays and our design studio can retouch or vectorise your logo.
