DESCRIPTION

The Tokenring keyring is a metal accessory designed to hold a removable euro token (Ø23.2 x 2.1 mm) mounted on a sturdy attachment. Its elongated shape with a split ring and small clip makes it simple to attach keys and other items. It is offered in several colours, including white and royal blue, and its compact size (Ø2.3 x 8 cm) makes it a practical, unobtrusive everyday item.

The metal finish provides reliable durability; the enamelled token face gives a smooth area suitable for marking. The keyring features a classic split ring, a small swivel link and a clip for quick token removal when required.

Personalise this keyring for corporate giveaways or event merchandise using laser engraving or pad printing (tampography). Ideal for businesses, sports clubs, associations and events. Minimum order quantity: 250 pieces (colours and sizes combined). Our studio can prepare and vectorise your artwork for production.
