| **Carton** | 2000 pieces |

## DESCRIPTION

RFID blocking card in credit-card format (8.5 x 5.5 cm) made of PVC, designed to shield contactless cards from electronic skimming. The slim construction (0.76 mm as supplied) slips easily into a card wallet, purse or passport holder. Its rigid, flat surface makes it practical and durable for frequent use during travel or business trips.

The card is offered in several colours (for example white) with a plain, uniform finish. PVC provides good dimensional stability and simple care: wiping with a damp cloth removes light marks. Its size and stiffness allow smooth insertion into standard slots without bending.

Not available to order individually: minimum order 1000 pieces (colours and sizes combined). Customisation available by pad printing, digital printing or doming. Suitable for companies, sports clubs, associations, events and professionals seeking a personalised travel accessory.

## COLOURS (1)

White
