Ref. IT2660

Reference	IT2660
Composition	Liquid
Material	Liquid
Average weight	0.063
Dimensions	10 x 6,5 CM
Country of origin	China
Carton	50 pieces

DESCRIPTION

Reusable Termosensor hand warmer (10 x 6.5 cm) designed for local relief. This liquid-filled warmer activates by pressing the internal metal disc — no batteries required — and can be reused after activation. Its flat rectangular shape with sealed edges provides a secure grip and even contact with the area being treated. The product is available in several colours, such as blue and transparent.

The smooth finish and visible welded seams ensure reliable sealing; the lack of mechanical parts makes surface cleaning straightforward. Compact and pocketable, it is practical for events, teams and individual use.

Customisation is possible by pad printing. This personalised hand warmer is available from a minimum order of 25 pieces (colours and sizes combined). We add your logo for companies, sports clubs, associations, events and private customers. Free quote within 24 hours on weekdays; collection at our Evere workshop or delivery in Belgium, France and Luxembourg.
