Battery type UM4 (aaa)

Ref. KC1806

Reference	KC1806
Composition	Battery
Material	Battery
Average weight	0.007
Country of origin	China
Carton	1800 pieces

DESCRIPTION

UM4 (AAA) battery in a standard cylindrical format, suitable for powering small portable devices. The item is supplied in a single colourway (multicolour); the photo shows the metallic finish and the typical individual packaging of AAA batteries. Material: battery. Uses include remote controls, small toys, torches and other devices requiring a 1.5 V cell. Storage: keep dry and away from heat sources and dispose of used batteries in accordance with local regulations.

The battery presents the usual handling characteristics: cylindrical shape, protruding positive terminal and marked polarity. This is a consumable product rather than a textile, with packaging designed to protect against shock and short circuits.

Customisation available for bulk orders: pad printing, screen printing and digital printing on items. Minimum order: 900 pieces (colours and sizes combined) — this minimum is indicated on the product page. Suitable for companies, clubs, associations and promotional campaigns. Our artwork studio can adapt your logo and we provide a free quote on weekdays.
