Trekking pole

Kimood · Ref. KI3001

Reference	KI3001
Brand	Kimood
Composition	100% Aluminium
Material	Aluminium
Country of origin	China
Carton	40 pieces

DESCRIPTION

Unisex trekking pole made from lightweight 100% aluminium, designed for hiking and walking on varied terrain. The pole is telescopic and folds into three sections, adjustable from 65 to 135 cm to suit the user. Its aluminium build balances lightness and durability, and the anti-shock system reduces vibration for improved comfort on descents and rough paths. The removable rubber tip protects the point when used on hard surfaces.

The photo shows the ergonomic handle with wrist strap and the tubular shaft with adjustment markings. The pole features a conical tip with a removable basket and a secure locking mechanism to fix the chosen length. Its foldable design means it stows easily in a backpack or can be attached when collapsed.

This personalised training and field equipment can be customised from a single piece using DTF printing, screen printing, pad printing, flex, transfer, embroidery for any accompanying textile parts or application of embroidered patches, and digital printing on items. Suitable for hiking clubs, sports teams, companies and private individuals. Graphic studio available to vectorise your logo, free quote within 24 hours on weekdays; collection at our Evere workshop or delivery in Belgium, France and Luxembourg.
