Extro series mouthguards

Safejawz · Ref. SJEXTRO

Reference	SJEXTRO
Brand	Safejawz
Composition	% EVA (Ethylene vinyl acetate)
Country of origin	China
Carton	100 pieces

DESCRIPTION

Designed for adults and juniors, the Extro series mouthguard is made from EVA with an ergonomic shape that cups the lower jaw and offers profiled support for the teeth. The cut follows the jawline to limit movement and provide comfortable stability during activity; the flexible material absorbs impacts and can be remoulded for a tailored fit. It is available in several colours, including Fangs / Black, Goldie and Ice, and features smooth moulded surfaces with functional relief areas for improved retention in the mouth.

In use you'll notice a moulded exterior and internal stabilising elements for the lower jaw: there are no seams or fastenings, and care is straightforward — rinse with lukewarm water and mild soap or an appropriate disinfectant. Offered in Adult and Junior sizes, it suits clubs, schools and individual athletes.

This mouthguard can be personalised from a single piece and is suitable for companies, sports clubs, associations or individuals seeking a personalised mouthguard. Customisation options include pad printing (tampography), screen printing and digital printing on the external areas; our graphic studio can retouch or vectorise your logo.
